Colour your life

Hardwood floors in
beautiful shades.

YOUR STYLE · YOUR FLOOR

BE HAPPY WITH THE
COLOUR IN YOUR LIFE.

COLOUR YOUR LIFE

Colours are a big part of our lives as we choose and observe them every day: what you wear, what is in your home and the different colours of nature. The most important thing is that you are happy with the colours in your life.

We have a wide selection of floors in many different colours; these floors beautifully match so many of the trend colours, but are also timeless colours that have been around for a while.

Interior designer and influencer Camilla has joined our campaign and offers her advice on how to choose colours for your

home. She runs the Instagram account @designlogg with a lot of different DIY projects and a focus on interiors.

Bring natural colours inside with a wooden floor and have fun combining them with the colours of the interior you prefer!

Your style. Your floor!

'The floor is one of your biggest surfaces in your room.'

'My name is Camilla and I am an interior designer and an influencer.'

When choosing a floor for my customers, I look at their requirements, their preferred style, area of use, colour palette and how to make a clear picture of the whole room or house. One piece of advice that helps when you are redecorating is to think about the feeling you want the room to give you.

When choosing wall colours, think about how they would fit in with the floor. Use colour samples and put them against the floor before you make up your mind. I would suggest creating your own colour palette or a mood board with the different materials you are interested in. It will make your redecoration process a lot easier!

If you choose a cold colour to go with a warm floor the wall and the floor will be more separated; each element will be its own star. Warm colours with a warm floor merge more into each other. The elements are more like-minded. Warm and cold colours can also be mixed. It all depends on whether you want to create a contrast or have a more harmonic look.

The floor is one of the largest surfaces in your room and will affect how the room looks; that's why we call it a main colour.

You can also choose skirtings in the same colours as the floor. This will enhance the feeling of the floor and give a nice flow to your room.

Oak Semi Smoked

Our Semi Smoked Oak impresses with its striking surface: typical oak but just a touch darker than transparent oiled or lacquered planks. These planks influence the colour concept of a room in a subtle and very elegant manner. The brushed surface sealed with Live Pure makes the floor look very natural.

Oak Pearl, Plank Castle

Oak Pearl

A light floor that brightens up the room and enhances the feeling of space. This is a floor that goes very well with a lot of different styles and colours. It gives you a serene feeling and does not overshadow other elements, unless you want it to. If you like bold colours, this floor is a great choice for creating stylish contrasts.

© Dulux, dulux.de

Oak Warm Grey

A natural floor with a hint of grey gives the floor a calm and honest expression. The structure in the floor creates a warm look to your room. Both light and bright colours harmonise with this floor beautifully, or be bold with darker colours. With our ultra-matt Live Pure surface treatment, this floor is well protected from dirt and liquids.

Oak Warm Grey, Plank Castle

Oak Brown Jasper

This dark brown floor with its black details is a centrepiece. It is a timeless floor that gives great warmth and depth to the room. The colour of the floor comprises different shades of brown, which creates a lively look to the floor. Both light and dark wall colours work perfectly well with this floor; it all depends on what feeling you want the room to give you.

Oak Pale White, Plank Castle

Oak Pale White

The structure in Oak Pale White creates a lively floor together with its light colour. Make this floor the centrepiece with calm wall colours or create a playful look with a bold interior. It is a versatile floor with which you can easily combine your preferred interior elements. With our ultra-matt Live Pure surface treatment, this floor is well protected from dirt and liquids.

Oak Horizon

The mild look of Oak Horizon emanates out a sense of calm. It has a smooth colour that is a mix of light brown and grey. With our ultra-matt Live Pure surface treatment, this floor is well protected from dirt and liquids.

Oak White Stone, Plank Castle

Oak White Stone

This floor has a lively structure and black knots that make a nice contrast to a light, almost white, floor. With this floor, you can either combine playful elements or make the floor an attractive divergence from a quiet interior.

Oak Authentic

The planks look like freshly sawn oak and present the colour and characteristics of the wood in a bright and clear manner, which also brings forth an authentic look. The surface is oiled with Live Natural which preserves the natural colour of the floor and protects it. The sanded and brushed surface gives the wood a warm presence.

Oak Sand

This calm and warm floor brings forth that sandy feeling after which it is named. The colour of the floor is perfect for those who want a natural colour that works just as well in a mountain cabin as it does in a house by the beach. It is a versatile floor that can be combined with many different materials or wall colours.

Oak Sand, Plank Castle

Oak Senses

This floor plays on the originality of the wood. The cracks and knots have been carefully filled in by hand and the surface of the wood deeply brushed. This creates a very special floor that gives each plank an individual and sincere look. With our Live Natural oil surface treatment, the floor looks like it has been freshly sawn. For a bright and clear look and special feel. Available in smooth and brushed surfaces.

We offer our floors in different formats. Choose the width that you think is the best size for your room or even combine different widths for an attractive varied look.

3-layer parquet

-  PLANK 138
14 x 138 x 2200 MM
-  PLANK 181
14 x 181 x 2200 MM
-  PLANK CASTLE
14 x 209 x 2200 MM
-  CHALETINO
15 x 300 x 2750 MM

5G

Click System

5G Click locking system

Take advantage of the 5G Click – the rapid locking technology.

The best choice for floating installation.

- A quicker and easier way to install single boards without tools.
- Significantly reduces installation time.
- The clear 'click' sound lets you know when installation is complete.
- Also suitable for full-surface gluing onto the subfloor.

5G Click

Every single board can be pressed down individually. The clear 'click' sound confirms that the board is installed properly.

Environment

Hardwood flooring is a natural product. As a company that works with wood, BOEN has been entrusted with upholding an important legacy.

BOEN flooring is a product of natural materials. Respect for nature and for the requirement of environmental sustainability is reflected in our processing and management of raw materials. BOEN is constantly seeking methods for processing the raw materials in the most gentle and sustainable manner possible.

The raw materials processed at BOEN come from sustainable forests and other controlled sources. Beyond that, the BOEN factories have implemented a chain-of-custody system in accordance with the FSC™ standards. The Forest Stewardship Council™ is a well-known forest certification scheme.

BOEN's production methods are noted for their quality and excellent use of resources. The timber is quickly transported to the sawmill and cut, so that the drying process can start as soon as possible, thereby avoiding

discoloration. The wood is dried under monitored conditions. This allows us to guarantee the highest degree of stability for our floors.

Multilayer hardwood flooring provides considerable savings in resources compared to solid hardwood flooring. The use of hardwood is limited to the wear layer. Three-fifths of our parquet is based on spruce and pinewood. Sawn and planed chips are by-products that occur naturally and are used in the factory's heating systems for the drying kilns, hot water supply and fuel pellets.

The German Blue Angel label has been awarded to BOEN, confirming that our manufacturing methods produce minimal amounts of waste gas and consequently contribute to a good interior climate.

OUR CERTIFICATES

Across the globe, **the Forest Stewardship Council™, FSC™**, promotes an approach to forest management that is environmentally appropriate, socially beneficial and economically viable.

The companies within the BOEN Group have implemented a chain-of-custody system in accordance with the standards of the FSC and are

able to supply FSC-certified products. BOEN supplies products with the FSC Mix 70% label. All of the products are available as FSC-certified on request only. Our Group licence code is FSCTM C009732, certificate number SGSCH-COC-001535.

www.fsc.org, FSC – the mark of responsible forestry.

The **Real Wood** logo is administered exclusively by authorised manufacturers belonging to the European Federation of the Parquet Industry (FEP). The decision in favour of real wood has ecological benefits.

www.blauer-engel.de/uz176

Products with the **Der blaue Engel (Blue Angel)** seal of quality contain very low levels of emissions in order to ensure a healthy indoor climate.

The international standard specifies the requirements for an environmental management system with which an organisation can improve its environmental friendliness, fulfil its legal and other obligations, and achieve its environmental goals.
